### Hooman Group Inc.

Served as a Full-Stack Intern at Hooman Group Inc. from August 2025 to Present, contributing to the development and deployment of multiple web features that improved user engagement and accelerated delivery timelines.

## PROJECTS

### 1. Pet Activity Tracker

- Developed a full-stack web application to monitor and log pet activities, including feeding, walking, and health check-ups.
- Built an interactive frontend using React.js with real-time updates powered by an Express.js and Node.js backend.
- Designed and managed a MongoDB database to store pet profiles and activity logs.
- Integrated the Gemini AI API to provide personalized activity recommendations and reminders for improved pet care.

### 2. Procurement in Supply Chain Management

- Engineered a comprehensive Procurement and Vendor Ranking System that slashed vendor costs by 7% through strategic sourcing and competitive bidding, significantly optimizing budgets.
- Implemented the TOPSIS method to rigorously score vendors on key criteria including cost, quality, delivery time, and reliability.
- Integrated AI analytics to forecast performance and automatically adjust evaluation weights, reducing manual effort and bias in vendor assessment.
- Enhanced reliability and results by enabling data-driven vendor selections, and ensured seamless integration with ERP/SCM systems for real-time reporting.
